

139.7mm (5.5 IN)

215mm (8.5 IN)

# **RADIUS** **USE & CARE**

## **18 INCH SNOW SHOVEL**

MODEL: 90111 / 90211

### **ASSEMBLY:**

#### **ENSURE ALL CONNECTIONS AND BOLTS ARE TIGHTENED BEFORE USE**

- Insert the plastic proprietary connector tip of the lower section into the opening on the the back of the shovel blade.
- Depress the lower section firmly into the blade opening to permanently secure the lower section of the shaft to the blade.
- Slide the upper section of the shaft into the lower section and secure the two pieces with the bolt, washer and nut provided.

#### **ATTACH THE FORE GRIP**

- Remove the two wingnuts that secure the bolts at the base of the fore grip and separate the fore grip attachment into two pieces.
- Place the two sections of the grip attachment around the lower section of the shaft, replace the bolts and tighten the wingnuts to secure the fore grip to the shaft.

**STORAGE:** When not in use for extended periods of time, remove the fore grip and store separately from the shovel either by hanging or laying it flat. This will extend the life of the fore grip and reduce any heat deformation during the summer months.
